

Darnel Clean Touch® Clear Cutlery

Robotized from pellet to pallet

You will be the first human to touch our cutlery

At Darnel, we developed Clean Touch Technology®, a state-of-the-art technology used to manufacture highly resistant cutlery through a **completely automated process**. From the moment the machine receives the raw material until the cutlery is packaged in individual bags and boxes, there is no human contact. This ensures complete hygiene during the manufacturing and packaging process until the product reaches the final consumer.

Our products are Eco-efficient: eco-friendly and affordable, 100% recyclable.

Our compact boxes result in significant benefits for our clients in terms of **storage space saving**, as well as easy handling and transportation, thus optimizing resources.

Also, this compact design **helps the environment by reducing emissions during transportation, and using less cardboard.**

DARNEL®

Darnel Clean Touch® Clear Cutlery

Fully automated production and packaging using Clean Touch technology, which guarantees that the consumer will be the first person to have contact with the products.
Practical, hygienic and perfect for special occasions.

Hygiene and protection

Cutlery manufactured with a fully automated process which guarantees the product is never touched by human hands during its production and packaging.

Heavyweight strength

Material does not break or damage easily.
