

Sustainable Product

AirBasket

An environmentally, socially and economically sustainable product line

At Darnel we found a way to protect the environment by giving plastic a new opportunity.

resq[®] products are manufactured with:

- Up to 100% post-consumer recycled material sourced from bottles and packaging.
- Our material is suitable for food contact according to FDA regulations.
- We use less natural resources such as water and virgin raw material in their production process.
- They have 40% less carbon footprint during their life cycle than equivalent carton and paperboard packaging.
- They generate 55% fewer emissions than virgin product.
- We use 95% less water in their production than equivalent carton and paperboard packaging.

resq[®] makes the circular economy a reality.

In addition, **we reduce the amount of waste that ends up in landfills, or worse, in rivers and oceans.** And best of all, Darnel **resq[®]** products can be recycled over and over again to produce new packaging or other products such as clothes or rugs, thus reducing the amount of virgin raw material extracted from the planet.

resq[®] is a commitment to the environment and the communities that we serve.

Darnel has already recycled the equivalent of over 4.6 BILLION plastic bottles.

We design our factories and products to reduce our environmental footprint. We have ISO 14001 certification in environmental management and our production centers are certified Zero Waste level Gold.

We support hundreds of families who make a living from recycling.

We obtain recycled material from hundreds of families who make a living from recycling. Collecting these materials represents, in many cases, their only opportunity for economic development. And thanks to their efforts, many entrepreneurs have created hundreds of recycling centers throughout the region.

AirBasket

Vented container to ensure product freshness during transport, display and at home. Ideal for fruits and vegetables. Lids sold separately.

Separate lid with a secure closure.

Stackable

Freezable

Vented packaging

It provides fruits and vegetables the oxygenation required to maintain their freshness for longer.

AirBasket

| #Item | Description | Case | Weight | Pallet | Cube |
|-----------------|--|-----------------------|---------|--------|---------------------|
