SafetyPlus® Tamper-Evident Bowls

A leak-proof container **designed with a tamper-evident seal**. The seal offers the consumer assurance that no one has opened the packaging during its transport and display.

An environmentally, socially and economically sustainable product line.

At Darnel we found a way to protect the environment by giving plastic a new opportunity.

resq products are **manufactured with a minimum of 70% post-consumer recycled material sourced from bottles and packaging**. Our material is suitable for food contact according to FDA regulations.

Less natural resources such as water and virgin raw material are used in its production process.

They have 40% less carbon footprint during their life cycle, generate 55% fewer emissions and use 50% less water in their production.

resq makes the circular economy a reality

In addition, **we reduce the amount of waste that ends up in landfills, or worse, in rivers and oceans**. And best of all, Darnel resq products can be recycled over and over again to produce new packaging or even clothes or rugs, thus reducing the amount of virgin raw material extracted from the planet.

resq means a commitment to the environment and the community.

Darnel has already recycled the equivalent of over THREE BILLION plastic bottles.

We design our factories and products to reduce our environmental footprint. We have ISO 14001 certification in environmental management and our production centers are certified Zero Waste level Gold.

We support hundreds of families who make a living from recycling

We obtain recycled material from hundreds of families who make a living from recycling. Collecting these materials represents, in many cases, their only opportunity for economic development. And thanks to their efforts, many entrepreneurs have created hundreds of recycling centers throughout the region.

Preserve food freshness for longer

They prevent food deterioration and contamination, reducing greenhouse gas emissions generated by food waste.

High visibility circular design

Perfect for salads, fruit, desserts and pastries.

Resistant material

Leak-proof

Keeps food fresh for longer as its secure closure prevents air and external particles from entering packaging.

Packaging available to everyone

They do not cost more than packaging made of other materials.

100% recyclable

They can be recycled over and over again.

Recessed perimeter for stable stacking

Recessed lines on the lid perfectly fit with the base to give greater stability when stacking containers.

Easy to close bowls

First close the tamper-evident button and then the perimeter of packaging.

Tamper-evident seal

They have a tamper-evident button to ensure the container has not been opened, as such there will always be evidence of opening.
